The Magic of Indian Weaves

ISO 14064 and GHG Protocol

1.Developing Accurate GHG Inventories

We accurately measure and document GHG emissions across all operations, ensuring our inventory covers all relevant emission sources for comprehensive and precise reporting.

2. Emission Reduction Strategies

We continuously identify opportunities to reduce GHG emissions and implement effective reduction strategies to minimize our GHG footprint and improve sustainability performance.

3. Transparent Reporting

We maintain transparent and accountable reporting of GHG emissions and reduction initiatives in compliance with ISO 14064 and the GHG Protocol standards.

ABOUT GHG EMISSION

Scope 1

DIRECT GHG EMISSION

Organization-owned emissions, on-site combustion, vital for assessing, reducing the entity's GHG footprint during period.

Scope 2

INDIRECT GHG EMISSION

Indirect emissions from purchased energy, crucial for assessing and reducing an organization's environmental impact for period.

Scope 3

OTHER INDIRECT GHG EMISSION

Indirect emissions from the entire value chain, encompassing suppliers, customers, influencing sustainability impact during period.

SCOPE 2

Indirect GHG Emission:

Indirect emissions from purchased energy, crucial for assessing and reducing an organization's environmental impact for period.

Sri All India Exports
Karur, India
The Magic of Indian Weaves

Purchased Electricity

Sri All India Exports
Karur, India
The Magic of Indian Weaves

SCOPE 3

Other InDirect GHG Emission

Indirect emissions from the entire value chain, including suppliers and customers, impact sustainability throughout the period by influencing resource use, production processes, and consumption patterns.
